

The **Environment & Climate Crisis** Action Group

## **GREEN UP YOUR GARDEN**

Eco-friendly gardening benefits both people and the planet. You can make a difference even in a small area.

- \* **Try No Mow May & let the wild flowers bloom**
- \* **Be water-wise; use a water butt or grey water**
- \* **Avoid peat based compost**
- \* **Grow some of your own fruit & veg. Use containers if your garden is small. Fresh & tasty!**
- \* **Compost kitchen and garden waste if you can**
- \* **Leave hedges uncut in bird nesting season**
- \* **Plant pollinators for bees, birds & butterflies**
- \* **Install bird box, bug hotel or hedgehog highway**
- \* **Avoid garden chemicals and pesticides**
